

Preferred profiles for therapeutics targeting Gram-negative infections			
Indication	BSI	LRTI	cUTI
Priority pathogens	Ab, Ec, Kp and Pa	Pa and/ or Kp essential. Other Enterobacterales and Ab preferred	Ec and Kp essential. Pm, Pa and other major cUTI pathogens preferred
Spectrum	Any spectrum of activity (broad or narrow) but requirement, at a minimum, to cover priority pathogen(s) for the indication		
Resistance	Activity against carbapenem and 3rd generation cephalosporin resistant strains (e.g. CRE, ESBL, CRAB, CRPA), low FoR, no cross resistance with standard of care antibiotics		
Administration	Oral and IV preferred. IV-only acceptable.		Oral or IV and oral* *IV only not acceptable

Pathogen Key: Ab: *Acinetobacter baumannii*, Ec: *Escherichia coli*, Kp: *Klebsiella pneumoniae*, Pa: *Pseudomonas aeruginosa*, Pm: *Proteus mirabilis*
